

# **Stellar Phoenix SharePoint Server Recovery**

## **Version 3.0 Installation Guide**

# Overview

Stellar Phoenix SharePoint Server Recovery software efficiently repairs damaged or corrupted database and retrieves all the documents from it. The software repairs the damaged or inaccessible database and creates a new MDF file, which can be incorporated into the SharePoint server to make the websites accessible. Also, it enables you to extract all the data and documents from the damaged database.

SharePoint facilitates administrator to set up Web sites to share information with others, manage documents and publish reports. This portal collaboration software makes it easier for people to work together. All website contents, such as items in document libraries and lists, are stored within an SQL Server database as MDF files. Due to several reasons like virus attacks, bad sectors in storage media, software malfunctioning etc, MDF file may get corrupted or damaged. This will make the website inaccessible and user will be unable to access the important documents stored in the database. In such situations, Stellar Phoenix SharePoint Server Recovery is the best solution for repairing the database to retrieve all documents from damaged or corrupted MDF files.

## What's New in this version?

# Ordering the Software

## How to Order?

To know more about **Stellar Phoenix SharePoint Server Recovery**, click [here](#).

You can purchase **Stellar Phoenix SharePoint Server Recovery** software online. Please visit [www.stellarinfo.com/database-recovery/sharepoint-recovery/buy-now.php](http://www.stellarinfo.com/database-recovery/sharepoint-recovery/buy-now.php) for more information and to place an order.

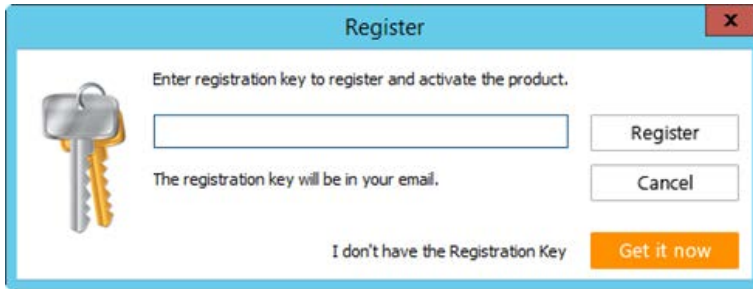

Alternatively, if the demo version is installed then you can click **Buy** icon to purchase the product.

# Registering the Software

The demo version is just for evaluation purposes and must be eventually registered to use the full functionality of the software. The software can be registered using the Registration Key that you receive via email after purchasing the software.

## To register the software:

1. Run the demo version of **Stellar Phoenix SharePoint Server Recovery** software.
2. On the main user interface, click the **Register** option. The **Register** window is displayed as shown below:

The screenshot shows a dialog box titled "Register" with a close button (X) in the top right corner. On the left side, there is an icon of a key. The main text reads: "Enter registration key to register and activate the product." Below this text is a text input field. To the right of the input field are two buttons: "Register" and "Cancel". Below the input field, it says "The registration key will be in your email." At the bottom of the dialog, there is a link "I don't have the Registration Key" and a button "Get it now".

3. If you don't have the registration key, click the **Get it now** button in the window to go online and purchase the product.
4. Once the order is confirmed, a **Registration Key** will be sent to the email provided.
5. Type the **Registration Key** (received through email after purchasing the product) and click **Register** button (Please ensure that you have an active Internet connection).
6. The software will automatically communicate with the license server to verify the entered key. If the key you entered is valid, the software will be registered successfully.
7. The '**Activation Completed Successfully**' message is displayed after the process is completed successfully. Click **OK**.

# Updating the Software

The Stellar Phoenix Update Wizard keep your Stellar Phoenix applications updated. Update option in the application is capable of checking the latest updates. This will check for both latest minor and major version available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs.

## To update Stellar Phoenix SharePoint Server Recovery:

1. In the Stellar Phoenix SharePoint Server Recovery main screen, Click  icon.
2. Stellar Phoenix Update Wizard window pops up. Click **Next** to proceed.
3. The wizard will start searching for the latest updates and if it finds any new version, a window pops up indicating the availability.
4. Click **Next**, the software will start downloading the update files from the server. When the process is complete, the software will upgrade to the latest version.

## Live Update may not happen due to following reasons:

- Internet connection is not available
- There are no updates available from the update site

If major version is available, to upgrade the software you have to purchase it.
